

Vending Machines Production

Innovative solutions

About the company

Newtek has been operating in the vending machine design, manufacturing and sales market since 2004. Newtek LLC concentrates on the development, production and sale of:

Mobile phone charging machines

- Increase the loyalty of your customers;
- Bring more earnings from additional advertising;
- Designed for both paid and free charging;
- Payment terminals and online cash registers can be installed;

Flovend flowers vending machine

- Flowers can be sold without any sellers, the system is automated;
- Simple menu allows you to quickly customize the operation of the machine to suit your needs;
- Maintaining constant temperature, which allows you to keep flowers fresh longer;
- The machine can be equipped with payment terminals accepting cash or credit cards:

Information kiosks

- Perform informative and advertising functions
- Can be equipped as touch kiosk;
- Can assist buyers in menu navigation or product choosing;
- Can be equipped with POS printer for customers convenience;

Automated lockers

- Lockers with automatic access to cells;
- Access to cells by pin code or Rfid lock;
- Individual design of each chamber:
- Cameras can be equipped with POS printer and payment terminal:

Kolamat beverage vending machine

- Compact dimensions allow the machine to be installed in transport (automotive or railway), indoors or outdoors!
- Patented system of cans delivery makes the process as convenient as possible and protects the machine from unauthorized access to the product!
- The machine can be equipped with a refrigeration unit!
- Drink loading compartment up to 200 pcs., aluminum cans 0.33-0.5 l, plastic bottles 0.5 l

Fashion vending styler for hair blow-out

- Helps ladies always look well-groomed in windy and rainy weather.
- The machine is suitable for any place where guests may wish to style their hair quickly.
- The machine can be equipped with payment terminals accepting cash or credit cards;

Electric vehicle charging stations Evcharger according to SAE j1772

- Designed for charging electric car batteries.
- Equipped with a special connector to connect to the vehicle's on-board charging network.
- "FAST CHARGER" corresponds to Level 2 (FAST CHARGER) according to SAE J1772 (16.8kW) - 220 V; 12-80 A

PAY payment terminals

- Manufactured only under individual orders with all requested accessories:
- Equipped with payment terminals accepting cash or credit cards
- Multimedia system and touchpad can be installed;

Postamat production

- Reduce parcel delivery costs
- Different functions can be implemented
- Design and equipment as per your requirements
- We can equip the postamats with remote access system

Newtech LLC means advanced software and technological solutions. Our machines have been performing various tasks based on different software logics for over 15 years.

Newtech has developed a large number of custom software solutions for clients in various fields. Based on the client's tasks, we can offer a ready-made solution or adapt the existing one

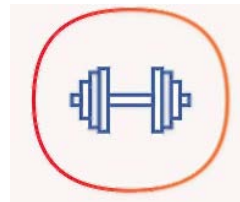

Our products are indispensable:

in hotels and campsites

in entertainment parks

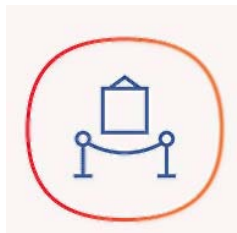

in sports clubs and water parks

at railway stations and airports

in shopping malls and supermarkets

in exhibition complexes

in enterprises and factories

in residential complexes and business centers

It can also be used in other areas.

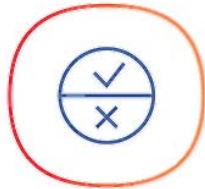

Our solutions are suitable for vending machines, postamats and charging facilities for gadgets, postal, subscriber and deposit cells, as well as any other electronic lockers.

If you plan to develop the software yourself, we can provide API, SDK and Communication protocol for your developers.

Possibility to connect additional options:

infrared sensors in cells with an alert system

diode about the cell state - busy/vacant

SMS notifications

E-mail notifications

polycarbonate windows

state monitoring

wires for charging mobile devices

modules for receiving cash or credit cards

ACS integration

mobile app

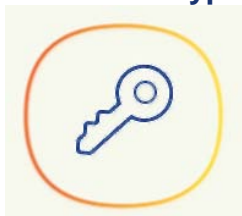

Also, on request, it is possible to connect other options.

Charging phones and tablets

The issue of charging mobile phones or tablets in public places is now more relevant than ever. Our mobile phone charging machines with built-in connectors for the most popular phone models solve this problem.

We offer several types of cell access:

access via a mechanical lock with increased security key

access via a card or key chain

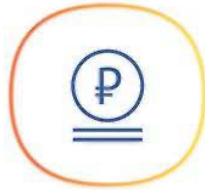

access via individual code - the code is created by the user

You can install both paid and free mobile phone charging, as well as convert machines into information kiosks and use them for advertising purposes, allowing additional earnings

The machines can be equipped with:

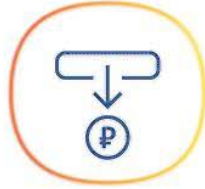

bank note receiver

coin receiver

online cash register

device for giving change

Your benefits:

Mobile phone charging machines help you provide a high level of comfort for visitors and increase their loyalty. Also, it's an additional source of income.

Mobile phone charging machines

INFO series

Info Wall Charger 22

Case	Wall-mount, anti-vandal, 1.5 mm steel
Monitor	Philips 22" FullHD;
Charging cables	iphone4 - 2 pcs., microUSB - 4 pcs., iphone5 - 2 pcs., USBtypeC - 2 pcs.
Overall dimensions (H*W*T)	675x752x68 mm
Optional	wi-fi, web cam, video player, mini PC, sensor panel, rest
Warranty	12 months
Certificate	yes

Info Wall Charger

Case	Wall-mount, anti-vandal, 1.5 mm steel
Light bar	Yes
Charging cables	iphone4 - 2 pcs., microUSB - 4 pcs., Iphone5 - 2 pcs., USBtypeC - 2 pcs.
Overall dimensions (H*W*D)	965x490x45 mm
Optional	wi-fi, web cam, video player, mini PC, sensor panel, rest, monitor.
Warranty	12 months
Certificate	yes

MOBI series

Mobi Totem

Case	Free-standing, anti-vandal, 1.5 mm steel
Locking cells	10 pcs.
Charging cables	iphone4 - 2 pcs., microUSB - 4 pcs., Iphone5 - 2 pcs., USBtypeC - 2 pcs.
Overall dimensions (H*W*D)	1650x420x250 mm (Tray width 700 mm)
Optional	wi-fi, wireless charger, digital security locks, Rfid locks.
Warranty	12 months
Certificate	yes

Warranty	12 months
Certificate	yes

Mobi Air

Case	Free-standing, anti-vandal, 1.5 mm steel
Charging cables	iphone4 - 3 pcs., microUSB - 3 pcs., Iphone5 - 3 pcs., microUSB - 3 pcs.
Overall dimensions (H*W*D)	2000x350x350 mm
Optional Warranty	wi-fi, wireless charger 12 months
Certificate	yes

Mobi Aero

Case	Free-standing, anti-vandal, 1.5 mm steel Bilateral.
Table for devices	2 pcs.
Plexiglass Light Chart	yes
Charging devices	USB port - 8 pcs., 220V socket sockets with earthing - 12 pcs.
Overall dimensions (H*W*D)	1700x350x120 mm
Optional	wi-fi, wireless charger, Branding
Warranty	12 months
Certificate	yes

Mobi – Info

Case	Free-standing, anti-vandal, 1.5 mm steel, hardened glass siding
Monitor	2 pcs.
Table for devices	2 pcs.
Charging devices	8 USB ports and 6 220V sockets;
Overall dimensions (H*W*D)	1850x770x185 mm (tray size 770 mm x 580 mm)
Optional	wi-fi, wireless charger, web cam, video player, mini PC, Sensor panel, Branding
Warranty	12 months
Certificate	yes

MOBI series

Mobi Street

Case	Steel, wood
Version	Outdoors. Designed as a square vertical column with a table
Charging devices	USB - 4 pcs.,
Overall dimensions (H*W*D)	1100x500 mm
Warranty	12 months
Certificate	yes

Mobi Wall Charger

Case	Wall-mount, anti-vandal, 1.5 mm steel
Charging cables	iphone4 - 2 pcs., microUSB - 2 pcs., Iphone5 - 2 pcs., USBtypeC - 2 pcs., microUSB - 2 pcs.
Overall dimensions (H*W*D)	350x500x60 mm
Optional	Support rest
Branding	Upon request
Warranty	12 months
Certificate	yes

Mobi mini 2

Case	Wall-mount, anti-vandal, 1.5 mm steel
Charging cables	iphone4 - 3 pcs., microUSB - 6 pcs., Iphone5 - 3 pcs., mini USB - 2 pcs., Nokia - 1 pcs., USB-1 pcs., USBtypeC - 1 pcs., 220V socket with earthing - 1 pcs.
Overall dimensions (H*W*D)	630x780x45 mm
Optional	Support rest, multimedia system
Holders for devices	18 pcs.
Warranty	12 months
Certificate	yes

Mobi Locker

Case	Wall-mount, anti-vandal, 1.5 mm steel
Charging cables	iphone4 - 1 pcs., microUSB - 1 pcs., Iphone5 - 1 pcs., USBtypeC - 1 pcs., Nokia - 1 pcs.
Locking cells	12 pcs.
Overall dimensions (H*W*D)	500x650x170 mm
Optional	wi-fi, wireless charger, digital security locks, Rfid locks. Branding
Warranty	12 months
Certificate	yes

MOBI series

Mobi wall

Case	Wall-mount, anti-vandal, 1.5 mm steel
Charging cables	iphone4 - 1 pcs., microUSB - 1 pcs., Iphone5 - 1 pcs., USBtypeC - 1 pcs., Nokia - 1 pcs.
Paid charging opportunity	yes
Locking cells	5 pcs.
Overall dimensions (H*W*D)	1000x600x230 mm
Optional	wireless charger, monitor, video player, online cash register with fiscal memory device, coinbox, POS printer, SMS updates.
Warranty	12 months
Certificate	yes

NOTEBOOK CHARGER 16

Case	anti-vandal, 1.5 mm steel
Purpose	Tablet and laptop charger
Capacity	Up to 16 laptops
Overall dimensions (H*W*D)	850x600x520 mm
Mobility	4 wheels
Branding	Upon request
Warranty	12 months
Certificate	yes

Mobi promocharger

Case	Plastic
Battery capacity	20800 mAh
Period of autonomous work	4 days
Charging devices	2 USB ports 2.1A and built-in micro USB and iPhone 5/6/7 cables
Overall dimensions (H*W*D)	237x130x114 mm
Branding	Upon request
Warranty	12 months
Certificate	yes

Mobi tablecharger

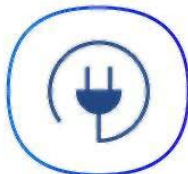

Case	Plastic
Battery capacity	15000 mAh.
Period of autonomous work	2 days
Charging devices	4 USB
Overall dimensions (H*W*D)	260x150x75 mm, table tent 210x150 mm
Branding	Upon request
Warranty	12 months
Certificate	yes

Automatic hand sanitizer

The machine is designed for automatic contactless disinfection of hands with disinfectants or sanitizers. It is placed on the floor, sanitizer spraying occurs automatically when the hands are located at a given distance, giving out the volume of sanitizer defined in the settings.

Advantages of automatic disinfectant:

Autonomy

Contactless operation

Cost-effectiveness

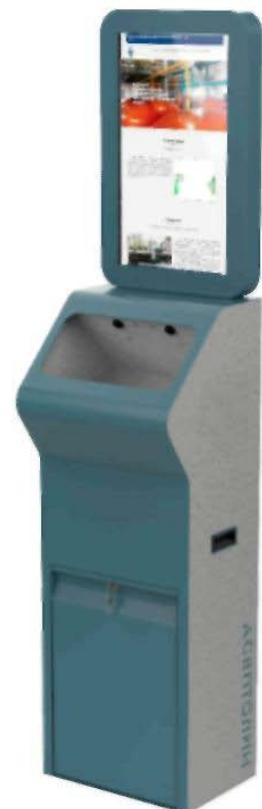

Safety and security

Potential up to 5 million cycles

Adjustable dose of antiseptic

Basic equipment:

- Anti-vandal protected case
- Motion sensor
Defines the moment hands are brought to the dispenser
- Monitor / billboard
- Video Player
- Antiseptic dispenser
Sprays antiseptic on hands
- Indicator with backlight
Switches on when spraying antiseptic and helps with the device
- Dose switch
- Central control board
- 10 l container for antiseptic
- Place for your logo
Post your company name and logo

Additional options:

- Branding
Post your company name and logo
- Any preferred color
- Mini PC
INTEL BOXNUC5PPYH Intel Pentium N3700 4G RAM 120 SSD
ROM Wi-Fi Bluetooth (remote monitor control, advertising in OSI)
- **Antiseptic**

Advantages over conventional means of disinfection:

Antiseptic container volume

Average price of one disinfection dose

Branding opportunity

Structure safety

Adjustable dispenser

Vaporization time

Custom design

Form Factor

1 - 22 litres

RUR 0.5

Very fast

Wall-mount, free-standing

0.3-1.5 litres

RUR 1.5

Slowly

Tabletop

A great alternative to water and soap

The antiseptic consumption is half as much as conventional solutions, thanks to a built-in customizable dispensing unit. Our unique offer allows you to reduce water consumption and save on related hand washing materials (soap, towel)

Contactless operation and security

The smart sensor is triggered when the hands are placed in the disinfection area and dosages the antiseptic

Automatic hand sanitizer

Dosing	Adjustible
Volume	1 l
Overall dimensions	375x230x150 mm
Power	4xAA batteries
Warranty	1 year
Certificate	yes
Additional	Sanitizer

Automatic disinfection system

HANDI DC mobile automatic system is designed for mass antiviral treatment in crowded places

Advantages of automatic disinfection system:

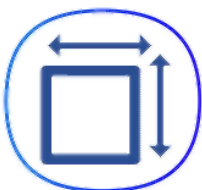

Mobility

Our disinfection system can be assembled very quickly. The installation at the site takes about two hours.

Cost-effectiveness

Low consumption of disinfecting solution: One container is enough to operate for 10-12 hours. Power consumption below 0.5 kW per hour.

Compactness

Overall dimensions of the system — 2.1 m * 1.5 m * 2 m wide.

Security

At the entrance there is a motion sensor that triggers disinfection. The treatment takes seconds and does not create any congestions

Simple design:

- Based on strong metal profile. Easy to assemble and disassemble, convenient to transport
- Dimensions of construction (LxHxD): 2,1x1,5x2 m
- Disinfecting solution container with a capacity of 120 l
- On the sides of the system from top to bottom there is a system of nozzles
- At the entrance there is a motion sensor that triggers disinfection
- Frame is covered with banner cloth
- Branding opportunity

How does that work?

Recognition

When a person enters, the motion sensor triggers the treatment process

Disinfection

The treatment is done with a disinfectant solution in the form of "fog" which is fed from several nozzles at a high pressure. The processing time is about 5 seconds. Streaming - over 500 people per hour

Protection

When a person passes through the tunnel, the viral particles on clothing, skin and hair get eliminated. The solution leaves no marks on the clothes and completely dries out in a few minutes

The research* proved:

- “Fog” treatment (fine spray) is the most effective and safe:
- Provides the most even coverage, reaching even hard-to-reach places
- Leaves surfaces dry, which ensures safety for people and does not damage surfaces.

* „Fine Sprays for Disinfection within Healthcare” G.G.Nasr, A. Whitehead and A.J. Yule

HANDI DC

Case	Free-standing, base: durable metal profile, material: metal, banner fabric	Power consumption	up to 100 W/220 V

Cabin size	HxWxD: 2.1x1.5x2 m		
Opening size	HxW: 1.85x1 m		

Information kiosks

Shopping center, exhibition hall, museum, medical or public institution - everywhere this touch kiosk will become the center of attention and a reliable assistant!

New technologies are being used to attract and serve customers, and touch kiosks are one of the few tools ready to establish two-way communication between the customer and service provider.

Information kiosks:

Allow to perform the function of informative and advertising nature, and can also serve as assistants in choosing the menu or products of the buyer;

Kiosks can be equipped with:

POS printer

sensor panel

built-in computer

web cam Full HD

Your benefits:

Interactive navigation, multimedia system in the museum, exhibition application and more - these can be implemented with free-standing touch kiosk produced by Newtech

Flower vending machine

The machine is developed by engineers of Newtech and has been successfully produced in Russia since 2012. It combines attractive design and functionality.

The machine is manufactured using the latest reliable components produced by OMRON, EMBRACO, ITL, Velleman, Transtecno, Winstar, and Plexiglas.

Characteristics:

- Bouquets constantly rotate on the central axis.
- The number and price of the selected bouquet are displayed on the display.
- The machine accepts RUR 10, 50, 100, 500, 1000, 5000 bank notes
- The machine is able to maintain constant temperature, which is vital for long-term preservation of flower freshness.
- Maintenance of the machine consists in timely replenishment of the bouquets assortment.
- After receiving money, the door of the selected bouquet automatically opens, after the purchase is completed, the door closes automatically, the machine goes into presentation mode.

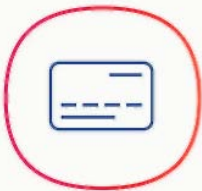

Floramats can be equipped with:

online cash register

POS printer

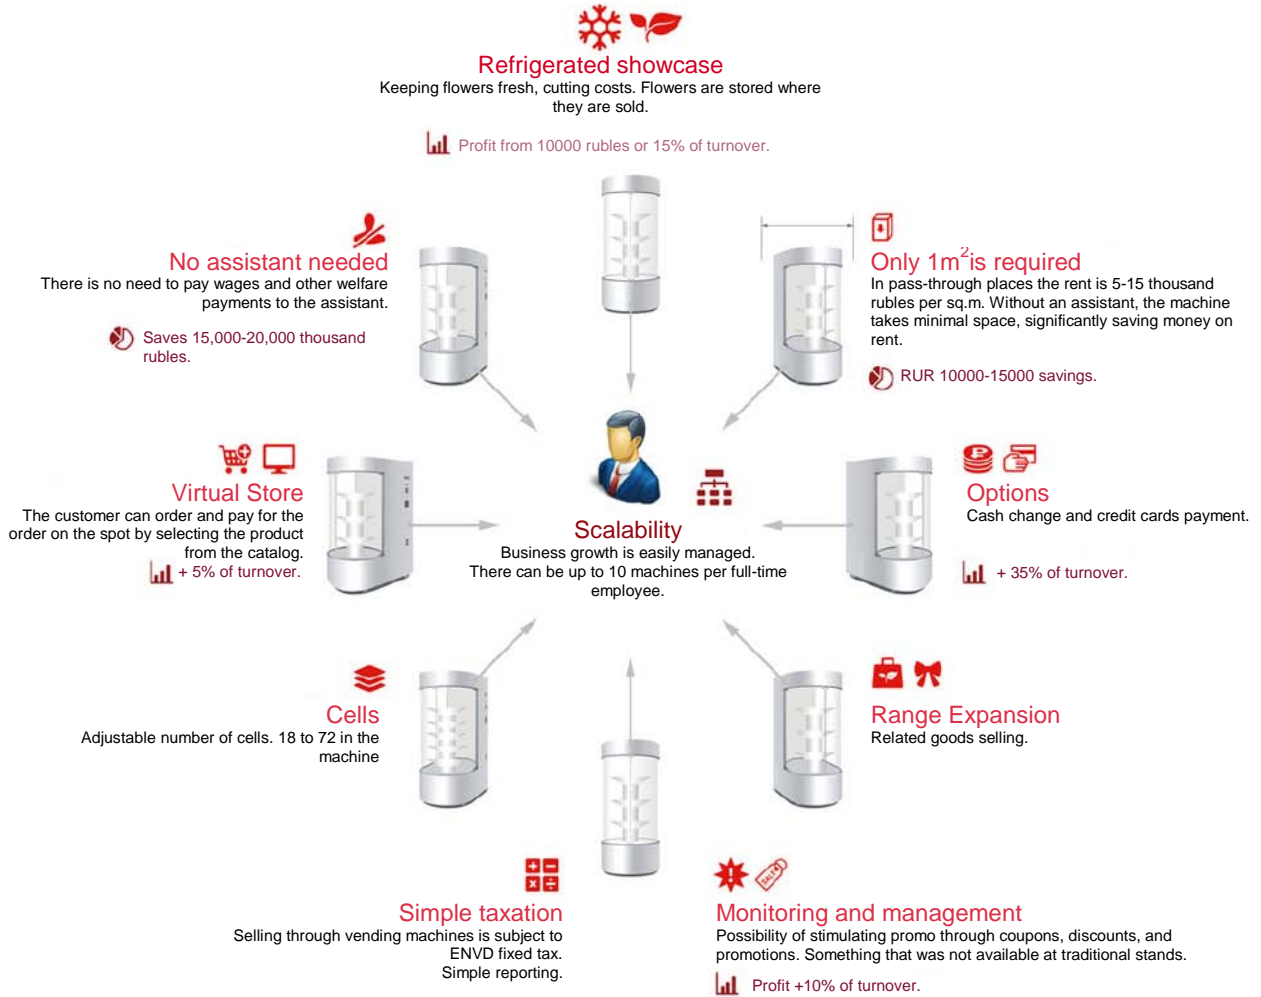

credit card payment system

contactless credit card reader

- You can view sales statistics and control the machine via a free software for your computer or tablet (smartphone)
- The report on the amount and quantity of the goods sold is sent automatically in the form of a text message to the phone of the equipment owner
- Integration of sales statistics into 1C
- The machine is equipped with ICT A7 payment system
- The show case is produced of transparent polycarbonate, and the structure itself is made of steel sheets
- LED showcase!
- Voltage stabilizer provides stable power to the machine and protects against voltage surges
- Free lifetime internet monitoring program!
- Free software for the bank note reciever for any currency

Your benefits:

Flower vending machine

FLOVEND series

FLOVEND-1

Characteristics

Vending Machine with showcase for 24 bouquets: bouquet height up to 60 cm, bouquet width up to 35 cm

The showcase has 4 levels:
6 to 18 bouquets on every level.

Automated doors

LED showcase

Refrigeration unit

ICT A7 cash acceptor, no change

Flower vending machine

Automated lockers in shopping malls, supermarkets, gyms, and entertainment complexes provide a high level of security and testify to the high status of the chain.

If desired, lockers can be equipped with a bank note or coin receiver to pay for use.

Access to cells:

pin code

Rfid lock

Chambers can be equipped:

POS printer

payment terminal

Your benefits:

The profitability of AKH is extremely high - one locker can be used 5-6 times per day.

It is possible to arrange paid access to the lockers writing-off the payment via RFID tags.

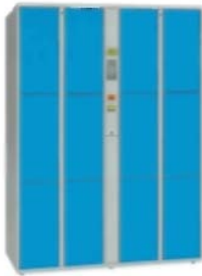

Loyalty to the company is enhanced by ensuring the safety of personal belongings.

Evcharger electric vehicle charging station

The expanding fleet of electric vehicles is stimulating a demand for electric charging stations. Without them, this trendy transport turns into a burden for its owner. Newtech engineers have developed Evcharger series of car charging stations.

Equipped with a special connector to connect to the vehicle's on-board charging network.

“FAST CHARGER” corresponds to Level 2 (FAST CHARGER) according to SAE J1772 (16.8kW) - 220 V; 12-80 A, maximal constant input power 7.68 W; maximal constant input power 7.68 W;

Fits the following cars:

Nissan Leaf,
Mitsubishi i-MIEV,
Chevrolet Volt,

Ford Focus Electric,
BYD E6,
Pininfarina Blue Car, Smart ED

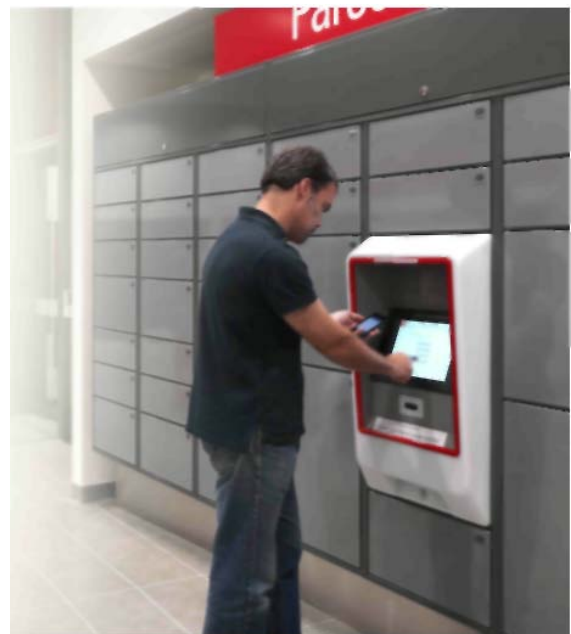

Postamats

Door-to-door delivery of goods at a certain time is almost impossible to plan. To avoid wasting time waiting for a courier, customers can take advantage of postamats. It is a self-service terminal with parcel storage cells and an automated order delivery unit.

Postamat advantages:

- secure storage
- convenient and simple 24/7 service
- customized software
- simple integration
- savings for courier companies
- parcel delivery takes only a few minutes
- possibility to return the order
- possibility of accepting payments for goods

Postamat assembly includes:

Sensor display with 10 inch diagonal and SAW technology

Celeron 2.8 processor

Sound module with speakers

Principle of operation:

- 1 - Online customer selects the location of the nearest locker and places an order;
- 2 - Courier delivers the order and puts it in the cell of the postamat;
- 3 - The customer receives a text message informing that the order is delivered;
- 4 - The customer comes to the postamat, enters the code from the text message, makes payment for the goods, the cell opens and the customer takes the goods.

Advantages of working with postamats:

- pick-up at any convenient time 24/7,
- possibility to pay at the place of pick-up;
- fast delivery, no queues,
- many locations,
- no need to wait for the courier,
- comfortable update system using text messages.
